

Adam O'Deven

adamodeven.com

Industrial design student
with technical fluency,
bridging form and function
to deliver human-centered
products that can actually
be built.

Skills

Sketching & Visualization

- Hand sketching
- Digital sketching
- Adobe Suite
- Keyshot
- Product Photography

CAD & Prototyping

- SolidWorks
- Fusion 360
- AutoCAD
- Design for Manufacturing
- CNC Machining
- 3D Printing

Design Research & Testing

- Market Research
- User Research
- Figma

Technical Integration

- Circuit Design
- Electrical Assembly
- Mechanical Assembly

Education

Georgia Institute of Technology – June 2024 - Present

- BS Industrial Design – BS Mechanical Engineering – 3.62 GPA
- Honors Program – GT Crew – Exec Board @ Chi Phi Fraternity

Notable Coursework: Ind. Design Studio, Intro to Sketch & Model I & II, User-Centered Design Methods, Statistics & Applications, Intro to Eng. Graphics, Circuits & Electronics, Computing for Engineers

Experience

REAR Lab Research – Aug 2024 - Dec 2024

Product Developer

- Advanced early assistive medical device concepts into user-informed prototypes; collaborated with professors to identify patient needs and refine form and ergonomics
- Compared and documented CAD workflows (SolidWorks / Fusion 360) to accelerate design iteration and reduce modeling time
- Collaborated with staff at the Shepherd Center, observing wheelchair use and designing directly with real-world constraints to ensure feasibility

RoboJackets K12 Foundation – June 2018 - Present

Mentor, Mechanical Engineer, Brand Designer

- Direct design identity and visual communication for the team, creating a cohesive brand system
- Mentor students on design thinking, visual branding language, and CAD techniques, supporting the team image
- Developed a curriculum teaching SolidWorks as a tool for design thinking, not just modelling, to students brand-new to CAD
- Led interdisciplinary student team of 25 in prototyping and assembling 28 competition-winning systems, ensuring both quality and performance

Georgia Tech Office of IT – Aug 2024 - Present

Wireless Network Services Student Assistant

- Support hardware transitions, documenting processes to make upgrades faster for future operations
- Address IT help requests and support groups on campus with network concerns
